# Index to Volume 18

Abdominal muscle activity, in pressure breathing, 37
ABRAMSON, D. I., 305
Absorption, by in vitro preparation of dog intestinal mucosa, 409
Acceleration: *see* Body stress
Acclimatization: *see* specific environmental condition
Acid-base balance
  fetal changes, before and after lung expansion, 877
  of cerebrospinal fluid during changing ventilatory state, 712
Acidosis
  respiratory
    acclimatization to, 1071
    calcium and phosphorus metabolism during, 1079
  uremic, respiratory control in, 717
Acquisition: *see* Learning
ADAMS, T., 772, 1291
Adenosine triphosphate, role in control of blood fluidity, 1105
Aerobic working capacity, in the cold (Eskimos), 764
Age
  and diet, effect on fasting blood glucose levels, 1221
  children, cystic fibrosis of pancreas, sweat sodium content and flow rate in, 1226
  effect
    on alveolar-arterial oxygen tension difference, 1043
    on alveolar-arterial difference in oxygen tension and dead space, 284
    on plasma antithrombin in arteriosclerosis, 329
    on pulmonary nitrogen clearance, 297
  fetus: *see* Fetus
  newborn
    alveolar-arterial oxygen gradient in, 534
    pulmonary function in, 534
AGHEMO, P., 367
AGOSTONI, E., 30, 43
Air, expired, estimation of energy expenditure from, 25
Airflow meter, screen-type, computer analysis of curves from, 149
Airway: *see* Respiratory airway
Alcohol, and cold, combined effect on heat balance, 975
ALPERT H., 1252
Altitude: *see also* Space flight
  acclimatization, regulation of respiration and heart rate in exercise during, 10
  and extreme cold, tolerance to (Nepalese pilgrim), 1234
  high
    basal oxygen uptake at, 909
    circulatory responses, 575
    effect on pulmonary circulation and oxygen transport, 560
    pulmonary vasconstriction at, 567
    respiratory control, role of cerebrospinal fluid pH, 1155
    right ventricular hypertrophy at, 913
  simulated, without hypoxia, ventilatory capacity during exposure to, 904
ALTLAND, P. D., 1268
Alveolar processes: *see under* Lungs
Ambient temperature: *see* Temperature, environmental
*p*-Aminobenzoic acid, acetylating ability of blood, relation to ambient temperature, 955
Amylolytic enzymes, pancreatic, species difference, 77
Analogue, electric, for uptake and exchange of inert gases, 197
Analyzer, infrared $CO_2$, computer analysis of curves from, 149
ANDERSEN, K. L., 756, 764, 975
ANDRUS, P. G., 1263
Anesthesia
  cardiorespiratory effects of pneumothorax during, 279
  distribution of inspired gas during, 1085
  hypotension during, 1130
  muscular exercise during, method for production of, 194
  oxygen washout studies, 888
Anemia
  effects on pulmonary diffusion, 123
  tissue gas tensions in, 734
ANGELAKOS, E. T., 69, 261
Angiotensin II, effects on ventricular performance, 585
ANTHONISEN, N. R., 539
Anticoagulants: *see* Coagulation, or specific anticoagulant
Antiplasmin, during venous occlusion, 1123
Antithrombin, plasma, elevation in aging arteriosclerotic subject, 329
Antiurokinase, during venous occlusion, 1123
Aorta
  hydraulic input impedance, 134
  pressure curves, signal analysis of, 1025
  radius and pressure, relationship, 1111
Apparatus and techniques
  animal exposure changer, for changed atmospheric conditions, 1035
  arterial pressure, indirect recording in unanesthetized rats, 437
  audio-frequency monitor for demonstrating cardiac electrical activity, 1011
  bath calorimeter for temperature regulation, 378
  cannulas, rigid, hydraulic impedance of, 648
  cardiac monitoring and telemetering system, 840
  chromatography: *see* Chromatography
  decompression method for in vivo body fat estimation, 1272
  densitometer, for measurement of dye concentration in flowing blood, 1294
  ducted airflow isothermal chamber for organ perfusion, 1289
  electric analogue for uptake and exchange of inert gases, 197
  electrocardiographic: *see* Electrocardiogram
  electrodes
    glass, for measurement of blood sodium and potassium, 950
    low profile system, for recording cortical electroencephalogram, 442
    oxygen, for blood, validation of, 1008
    silver-silver chloride, as a nonpolarizable bioelectrode, 397
  electronic cable for chronic implantation in living tissue, 1039
  ergometer for measuring constant-work rate, 205
  flowmeter, electromagnetic
    effects of flow profile on accuracy of, 652
    for urine flow measurements, 845
    miniature, for coronary arteries, 224
    square-wave, employing commercially available recorder, 1265
    trapezoidal-wave, improvements in, 230
  flowmeter, implantable transducer for, based on Helmholtz coil, 227
  for administering carbon dioxide, in study of effect on respiration, 1023
  for determining blood pressure in flight, 210
  for determining zeta potentials from streaming potentials, 1263
  for discarding dead-space gas, 833
  for hindquarter perfusion in studying peripheral vascular responses, 645
  for measurement of lungs-thorax compliance and resistance, 424
  for measurement of respiratory pleural pressure changes, 513
  for portal vein ligation, 405
  for simultaneous assay of $K^{42}$, $Na^{24}$, and $Br^{82}$ in body composition measurements, 1252
  for obtaining cerebrospinal fluid pressure measurements, 837
  for obtaining pulse pressure information from microcirculation, 189
  for producing muscular exercise during anesthesia, 194
  for prolonged exposure of small animals to artificial atmospheres, 633
  for quantitation of oxygen consumption in tumor-bearing rats, 216
  for registration of oxyhemoglobin dissociation curves, 420
  for reversible cooling of cerebellum, 597
  for study of learning in hypothermic rats, 1016

Apparatus and techniques—*Cont.*
for study of water vapor pressure of body surface, 1019
for sweat stimulation and collection, 1038
freezing and defrosting of semen, controlling and recording rates of, 407
impedance oculograph, 215
indwelling needle and cannula, self-retaining, easily removable, 835
intestinal mucosal absorption by an in vitro preparation, 409
intracranial chemical stimulation system, 221
microelectrode, flexible, for continuous recording of intra-arterial oxygen tension in normal man, 1247
micrometer, electronic, 636
microscope, as stereotaxic instrument, 445
muscle ergograph, modified, 672
muscle transducer
extraluminal contractile force, for gastrointestinal muscle, 658
method of recording respiratory movement, 418
olfactory threshold technique, 414
photodermoplanimeter, 1285
plethysmograph: *see* Plethysmograph
pressure chamber, dual purpose, with automatic safety devices, 1268
renal artery clamp and applicator, 1033
rebreathing method, for determining mixed venous carbon dioxide tension during exercise, 668
respirator, for laboratory use, 443
restraint chair, for study of ovulation in rhesus monkey, 1270
servomechanism, to control output of artificial ventricle, 1029
signal analysis methods, application to arterial and aortic pressure curves, 1025
television microscope, for recording of arteriolar dimensions, 1041
thermal conductivity cell, for measurement of evaporative water loss, 1291
thorax, acoustic transmission characteristics, 428
tissue chopper, automatic, with quick-change sterilizable cutting parts, 191
tracheostomy, chronic, 439
tremor variance computer, 440
x-ray monitor, simple solar-cell, 209
Armstrong, B. W., 798
Arterial-alveolar processes: *see* Lungs
Arteries
blood pressure
effect of partial immersion in water, 1171
indirect recording in unanesthetized rats, 437
oxygen tension, continuous recording, with flexible microelectrode, 1247
pressure curves, signal analysis of, 1025
Arteriolar-alveolar processes: *see* Lungs
Arterioles, dimensions, recording with a television microscope, 1041
Arteriosclerosis, in the aged, elevation of plasma antithrombin in, 329
Arteriovenous fistula, systemic, effect on diffusing capacity, 553
Articular cartilage, "imperfect" elasticity, nature of, 393
Artificial ventilation: *see* Lungs
Ashton, C. H., 668
Aspiration, of fresh water, reflex pulmonary hypertension from, 179
Assali, N. S., 877
Åstrand, P.-O., 619
Athletes: *see* Physical training
Atkins, A. R., 205
Atmospheres, artificial, closed system for prolonged exposure of small animals to, 633
Atmospheric conditions, changed, exposure chamber for, 1035
Atmospheric pressure
during simulated space flight, effect on pulmonary mechanics and diffusing capacity, 696
high $O_2$ tensions at, cardiopulmonary manifestations, 849
Atrium: *see* Heart atrium
Atrophy, muscular, from immobilization, studies on tissue during recovery from, 623
Attebery, J. T., 1221
Auchincloss, J. H., Jr., 19
Audio frequency monitor, for demonstrating cardiac electrical activity, 1011
Austin, W. H., 301
Avery, M. E., 895
Aviation: *see also* Space Flight, Altitude
blood pressure during flight, method for determining, 210
Avoidance behavior: *see* Behavior, Learning

Bailey, T., 933
Baldes, E. J., 1171
Balin, H., 1270
Ballin, H., 843
Barbero, G. J., 1226
Barker, E. S., 815
Barry, T. J., 445
Bartlett, D., Jr., 734
Basal metabolism rate: *see* Metabolism
Bass, P., 658
Bassingthwaighte, J. B., 1294
Bateman, M., 933
Bates, D. B., 687
Bates, D. V., 699
Bauman, A. W., 1239
Bath calorimeter, temperature regulation in, 378
Batterton, D. L., 383
Baugh, C. W., 970
Beaulieu, D. E., 216
Beck, R. E., 1263
Becker, F. F., 1193
Behavior: *see also* Learning
avoidance, and skin temperature, relation, 752
Belding, H. S., 383
Bell, J. W., 189
Ben-Ishai, Z., 955
Bennett, D. R., 658
Bentivoglio, L. G., 687
Berglund, E., 983
Bergman, N. A., 1049, 1085
Bergofsky, E. H., 447
Bernardini, P., 261
Bhatia, B., 418
Bicaford, A. F., Jr., 334
Bird, G. S., 970
Bishop, B., 37
Bishop, J. M., 284, 1043
Bleeding, ventricular volume changes caused by, thermodilution studies, 129
Blevins, W. V., 1183
Blondheim, S. H., 955
Blood: *see also* specific anatomical location
acetylating capacity, relation to ambient temperature, 955
analysis, in validation of insorption, 829
arteriovenous, metabolite concentrations, 933
circulation: *see* Circulation, Microcirculation
coagulation: *see* Coagulation
constituents: *see* specified constituent
densitometry, with background dye, 1294
fetal, Bohr effect, variability of magnitude of, 729
fibrinolysis: *see* Fibrinolysis
flow
and gas exchange, balance during partial heart-lung bypass, 251
and rheology, in microcirculation, 255
changes in forearm during physical training, 789
cutaneous, relation to skin temperature and sweating, 781
during bradykinin infusion, 1003
effect on carbon monoxide diffusion in perfused lung, 722
forearm, bilateral differences as measured with capacitance plethysmograph, 997
in head-stand posture, 987
measurement, by indocyanine green densitometry, 1294
profile, effects on accuracy of electromagnetic flow meter, 652
flowmeter: *see under* Apparatus
fluidity, control mechanisms in, role of adenosine triphosphate, 1105
hemodialysis, mathematical approach, 141
hemodynamics, of collapsible vessels with tone (vascular waterfall), 924
mixed venous, evidence that carbon dioxide tension is not a regulator of ventilation during exercise, 345
optical density
effect of full oxygen saturation and changes in carbon dixide tension, 739
measurement by indocyanine green densitometry, 1294
oxygen electrode for, validation of, 1008
pressure
during flight, method for determination of, 210
measurement, with flexible plethysmograph, 838
pressure-flow relationships, hydraulic input impedance in study of, 134
rheology, and flow, in microcirculation, 255
specific heat, determination of, 843
viscosity, effect of fatty meal, 1217
Blood-brain barrier, in altitude acclimatization, 1155

Blood cells: *see* Cells, or specific type of cell or organic location
Blood vessels
collapsible, with tone, hemodynamics of, 924
peripheral, responses of, study by means of hindquarter perfusion technique, 645
pressure, effect on carbon monoxide diffusion in perfused lung, 722
responses induced by ion transfer of histamine, 305
vascular waterfall, 924
BLOUT, S. G., JR., 567
Body composition
and serum electrolyte concentrations, relation, 943
decompression method for in vivo estimation of, 1272
simultaneous assay of $K^{42}$, $Na^{24}$, and $Br^{82}$, 1252
Body density, decompresion method for in vivo estimation of, 1272
Body fat: *see* Fat
Body fluid spaces, in normal monkeys, 1231
Body position
effect on alveolar-arterial oxygen tension difference, 1043
head-stand, cardiovascular responses, 987
head-up tilt, cerebral circulation during, 1130
Body size, and respiratory dead space relation, 519
Body strain index, effect of vapor pressure on, 808
Body stress
acceleration
effects of hypothermia on syndromes of, 387
hormone changes during, 1167
centrifugation, hormone changes during, 1167
headward acceleration, effect of partial immersion in water, 1171
isolation and restraint, hormone changes during, 1167
vibration
effect of carbon dioxide on hyperventilation during, 349
vertical sinusoid, in total immersion, effects, 1193
Body surface
radiation area, photodermoplanimeter for measurement of, 1285
water vapor pressure, regional relationship, 1019
Body tremor, amplitude, variance as a measure of, 440
Body weight: *see also* Obesity
effects of differential housing and stress, 937
loss, insensible, in comfort temperatures, 1188
Bohr effect, in fetal blood, variability of magnitude of, 729
Bohr shift rate, in red cell suspensions, 317
BOLING, E. A., 943, 1252
BOND, G. F., 509
BONDURANT, S., 357, 513
Bone marrow, partial shielding, in total body irradiation, 629
BOUHUYS, A., 297
BOWERS, J. A., 357
BOXELL, J. F., 794
Bradycardia
in apneic underwater diving and breath holding, 854
in human divers, 489
Bradykinin infusion, blood flow and oxygen usage during, 1003
Brain
damage, cerebral dysfunction from: *see* Cerebral dysfunction
chemical stimulation, system for chronic or self-infusion, 221
electroencephalograph: *see* Electroencephalograph
BRAMANTE, P. O., 216
Breath-hold diving: *see* Underwater diving
Breath holding
diaphragm activity during, 30
diffusing capacity and: *see* Lungs, diffusing capacity
heart rate responses, 854
with air, alveolar gas exchange during, 478
Breathing: *see also* Respiration
nervous regulation of, at beginning of exercise, 1183
of carbon dioxide, transient responses of human subjects awake and asleep, 289
of oxygen: *see* Oxygen
positive pressure, intermittent, effect on alveolar-arterial gradient, 1049
pressure
abdominal muscle and diaphragm activities in, 37
and voluntary relaxation, volume-pressure relationships during, 505
rebreathing method, for determining mixed venous carbon dioxide tension during exercise, 668
work and force of, relation to airway volume and resistance, theory, 863
BREDELL, G. A. G., 361
BRENMAN, R., 593
BRISTOW, J. D., 129
BRITTEN, A., 255
BRODY, M. J., 645
Bromine-82, in simultaneous assay of body composition measurements, 1252
Bronchi, pressures and dimension, in health and obstructive airway disease, 699
Bronchitis, compliance of chest wall during, 707
Bronchoconstriction
after single deep inspirations, 114
compliance during, 539
BROUHA, L., 1095, 1099
BROWN, G. M., 970
BROWN, H. W., 1139
BROWN, O. F., 1265
BRUBACH, H. F., 1268
BUCKLES, L. J., 349
Burn trauma
effect of serum on myocardial respiration, 821
effect on serum enzymes, 818
BURNAP, D., 997
BURNEY, R. G., 1029
BURROWS, B., 123, 722
BURTON, J. E., 89
BURTON, S. D., 650
BUSH, R. D., 752
BUSKIRK, E. R., 603
*n*-Butane, nitrogen dilution of, in olfactory threshold technique, 414
BUTLER, J., 345

CADY L. D., JR., 402
Calcium
metabolism, during acclimatization to carbon dioxide, 1079
serum, seasonal variation in hypothermia, 967
Calcium-45, metabolism, after single and multiple doses, 824
CANDER, L., 1065
Cannula
indwelling, and needle, self-retaining, 835
rigid, hydraulic impedance of, 648
Capillary, quartz, for determination of zeta potentials from streaming potentials, 1263
Carbon monoxide
hemoglobin uptake in erythrocytes
effect of metabolism, 175
effect of shape-volume changes, 171
effect of temperature, 166
stop-flow measurements, 158
pulmonary diffusion: *see* Lungs
Cardiogenic oscillations, as an index of pulmonary blood flow distribution, 233
Cardiopulmonary manifestations, with high $O_2$ tensions at atmospheric pressure, 849
Cardiorespiratory system, effects of pneumothorax, 279
Cardiovascular system, responses
to head-stand posture, 987
to leg exercise, effects of epinephrine, 1118
CARDUS, D., 845
Carbon dioxide
acclimatization to
calcium and phosphorus metabolism during, 1079
respiratory, 1071
alveolar-arterial gradients, effect of different pressure breathing patterns, 1049
breathing, transient responses of human subjects awake and asleep, 289
effect on respiration, study using a new method of administering carbon dioxide, 1023
infrared analyzer, computer analysis of curves from, 149
inspired, ventilatory response, 895
response, in bilateral cerebral dysfunction, 1139
solubility, in serum at 15 to 38 C, 301
tension
effect on blood optical density, 739
effect on hyperventilation produced by vibration, 349
end-tidal, and work output of respiratory muscles, relation, 497
of erythrocytes, Bohr shift rate, 317
of mixed venous blood, evidence of negative role in regulation of ventilation during exercise, 345

Carbon dioxide—*Cont.*
threshold for respiratory system in acute hypoxia, 1053
venous, during exercise, rebreathing method for determining, 668
CAREY, C. R., 1071, 1079
CARMECI, P., 393
Carotid body chemoreceptor stimulus, specificity of hydrogen ion concentration as, 580
Cartilage, articular, "imperfect" elasticity, nature of, 393
Catecholamines
excretion
during heat deacclimatization, 1206
during simulated space stresses, 1167
studies on, during experiments in a space cabin simulator, 1257
CATER, D. B., 888
CAVAGNA, G. A., 1
Cells: *see also* specific type or anatomical location
energy metabolism, role in controlling blood fluidity, 1105
Centrifugation: *see* Body stress
Cephalin, anticoagulant effects in thromboplastin generation test, 325
Cerebellum, reversible cooling, method, 597
Cerebrum
circulation, during hypotension and head-up tilt, 1130
dysfunction, bilateral, hypoxic-hypercapnic interaction in, 1139
tissue oxygen tensions, during exposure to high oxygen pressure, measurement of, 869
Cerebrospinal fluid
acid-base balance during changing ventilatory state, 712
pH, role in respiratory control at high altitude, 1155
pressure measurement, simplified method, 837
CERRETELLI, P., 367, 371
Cesium-137, retention, effect of environmental temperature, 786
Chambers, experimental: *see under* Apparatus and techniques

## No. 1. JANUARY 1963

External work in walking. *Cavagna, G. A., F. P. Saibene, and R. Margaria* ..... 1
Regulation of respiration and heart rate response in exercise during altitude acclimatization. *Dejours, P., R. H. Kellogg, and N. Pace* ..... 10
Effect of obesity on ventilatory adjustment to exercise. *Auchincloss, J. H., Jr., J. Sipple, and R. Gilbert* ..... 19
Estimation of energy expenditure from expired air. *Liddell, F. D. K.* ..... 25
Diaphragm activity during breath holding: factors related to its onset. *Agostoni, E.* ..... 30
Abdominal muscle and diaphragm activities and cavity pressures in pressure breathing. *Bishop, B.* ..... 37
Motor innervation and pattern of activity of cat diaphragm. *Sant'Ambrogio, G., D. T. Frazier, M. F. Wilson, and E. Agostoni* ..... 43
Effect of expiratory flow patterns on lung emptying. *Young, A. C., C. J. Martin, and W. R. Pace, Jr.* ..... 47
A physiological criterion for setting thermal environmental limits for everyday work. *Lind, A. R.* ..... 51
Physiological effects of continuous or intermittent work in the heat. *Lind, A. R.* ..... 57
Central and peripheral factors in dynamic thermoregulation. *Randall, W. C., R. O. Rawson, R. D. McCook, and C. N. Peiss* ..... 61
Environmental temperature and energy expenditures. *Consolazio, C. F., L. O. Matoush, R. A. Nelson, J. B. Torres, and G. J. Isaac* ..... 65
Electroencephalographic activity after circulatory arrest in the hypothermic dog. *Gökhan, N., and E. T. Angelakos* ..... 69
Temperature-humidity effects on thyroxin $I^{131}$ disappearance rates in cattle. *Johnson, H. D., and H. H. Kibler* ..... 73
Species difference in pancreatic lipolytic and amylolytic enzymes. *Zieve, L., W. C. Vogel, and W. D. Kelly* ..... 77
Pulmonary diffusing capacity for CO and hemodynamic changes in isolated perfused cats' lungs. *Duke, H. N., and W. Rouse* ..... 83
Effects of altering ventilation on steady-state diffusing capacity for carbon monoxide. *Kilburn, K. H., H. A. Miller, J. E. Burton, and R. Rhodes* ..... 89
Determination of dissolved $N_2$ in blood by gas chromatography and (a-A) $N_2$ difference. *Farhi, L. E., A. W. T. Edwards, and T. Homma* ..... 97
Determination of alveolar capillary temperature. *Edwards, A. W. T., T. Velasquez, and L. E. Farhi* ..... 107
Bronchoconstriction in man following single deep inspirations. *Lloyd, T. C., Jr.* ..... 114
Ventilatory effects on left atrium and pulmonary vascular resistance. *Kuramoto, K., and S. Rodbard* ..... 117
Effects of anemia and hemorrhagic shock on pulmonary diffusion in the dog lung. *Burrows, B., and A. H. Niden* ..... 123
Thermodilution studies of ventricular volume changes due to isoproterenol and bleeding. *Bristow, J. D., R. E. Ferguson, F. Mintz, and E. Rapaport* ..... 129
Hydraulic input impedance to aorta and pulmonary artery in dogs. *Patel, D. J., F. M. de Freitas, and D. L. Fry* ..... 134
A mathematical approach to hemodialysis. *Yoder, R. D.* ..... 141
Computer analysis of curves from an infrared $CO_2$ analyzer and screen-type airflow meter. *Noe, F. E.* ..... 149
Stopped-flow measurements of CO and $O_2$ uptake by hemoglobin in sheep erythrocytes. *Sirs, J. A., and F. J. W. Roughton* ..... 158
Uptake of $O_2$ and CO by hemoglobin in sheep erythrocytes at various temperatures. *Sirs, J. A.* ..... 166
Effect of shape-volume changes on uptake of CO and $O_2$ by hemoglobin in erythrocytes. *Sirs, J. A.* ..... 171
Influence of metabolism on uptake of CO and $O_2$ by hemoglobin in erythrocytes. *Sirs, J. A.* ..... 175
Reflex pulmonary hypertension of fresh-water aspiration. *Colebatch, H. J. H., and D. F. J. Halmagyi* ..... 179
Water diuresis after hypnotic suggestion in hydropenic subjects. *Hulet, W. H., T. Shapiro, B. E. Schwarcz, and H. W. Smith* ..... 186

### SPECIAL COMMUNICATIONS

A technique for obtaining detailed pulse pressure information from microcirculation. *Parrish, D., and J. W. Bell* ..... 189
An automatic tissue chopper with quick-change sterilizable cutting parts. *Gordy, E., and G. Sieber* ..... 191
A method for producing muscular exercise in anesthetized dogs and its validity. *Kao, F. F., and E. E. Suckling* ..... 194
An electric analogue for uptake and exchange of inert gases and other agents. *Mapleson, W. W.* ..... 197
An accurate constant-work-rate ergometer. *Atkins, A. R., and J. D. Nicholson* ..... 205
A simple solar-cell X-ray monitor. *Cobbold, R. S. C., and N. J. Jackson* ..... 209
Automatic indirect blood pressure determination in flight. *Ware, R. W., and A. R. Kahn* ..... 210
Impedance oculograph—a new technique. *Sullivan, G. H., and G. Weltman* ..... 215
A method of quantitation of oxygen consumption of tumor-bearing rats. *Bramante, P. O., A. S. Nunn, M. C. Steiner, and D. E. Beaulieu* ..... 216
An intracranial chemical stimulation system for chronic or self-infusion. *Myers, R. D.* ..... 221
Miniature electromagnetic flow meter applicable to coronary arteries. *Khouri, E. M., and D. E. Gregg* ..... 224
Design of an implantable flowmeter transducer based on the Helmholtz coil. *Yanof, H. M., A. L. Rosen, and W. C. Shoemaker* ..... 227
Improvements in trapezoidal-wave electromagnetic flowmeter. *Yanof, H. M., P. Salz, and A. L. Rosen* ..... 230

## No. 2. MARCH 1963

Cardiogenic oscillations as an index of pulmonary blood flow distribution. *Fowler, K. T., and J. Read* ..... 233
Effect of alveolar hypoxia on zonal distribution of pulmonary blood flow. *Fowler, K. T., and J. Read* ..... 244
Balance of blood flow and gas exchange during partial heart-lung bypass. *Hopf, M. A., and P. M. Galletti* ..... 251
Rheology of blood and flow in the microcirculation. *Merrill, E. W., E. R. Gilliland, G. Cokelet, H. Shin, A. Britten, and R. E. Wells, Jr.* ..... 255
Frequency components and positional changes in electrocardiogram of the adult rat. *Angelakos, E. T., and P. Bernardini* ..... 261
Pulmonary capillary blood volume in dog: effects of 5-hydroxytryptamine. *Young, R. C., Jr., H. Nagano, T. R. Vaughan, Jr., and N. C. Staub* ..... 264
Change in diffusing capacity with blood flow in an improved isolated lung preparation. *Rosenberg, E.* ..... 269
A comparison of static volume-pressure relations of excised pulmonary lobes of dogs. *Frank, N. R.* ..... 274
Cardiorespiratory effects of large pneumothorax in conscious and anesthetized dogs. *Kilburn, K. H.* ..... 279
A-a difference in $O_2$ tension and physiological dead space in normal man. *Raine, J. M., and J. M. Bishop* ..... 284
Transient responses to $CO_2$ breathing of human subjects awake and asleep. *Fuleihan, F. J. D., T. Nakada, J. T. Suero, E. S. Merrifield, R. E. Dutton, S. Permutt, and R. L. Riley* ..... 289
Factors limiting depth of a maximal inspiration in human subjects. *Mead, J., J. Milic-Emili, and J. M. Turner* ..... 295
Pulmonary nitrogen clearance in relation to age in healthy males. *Bouhuys, A.* ..... 297

Solubility of carbon dioxide in serum from 15 to 38 C. *Austin, W. H., E. Lacombe, P. W. Rand, and M. Chatterjee* . . 301
Vascular responses produced by histamine by ion transfer. *Abramson, D. I., S. Tuck, Jr., A. M. Zayas, T. M. Donatelli, L. S. W. Chu, and R. E. Mitchell* . . . . . 305
Gas transfer across the skin in man. *Klocke, R. A., G. H. Gurtner, and L. E. Farhi* . . . . . 311
Rate of the Bohr shift in human red cell suspensions. *Craw, M. R., H. P. Constantine, J. A. Morello, and R. E. Forster* . . . 317
Anticoagulant effects of concentrated cephalin in the thromboplastin generation test. *Coffield, K. J., and M. A. Cocanour* . . . . . 325
Elevation of plasma antithrombin in the aging arteriosclerotic subject. *Pilgeram, L. O., A. C. Schram, and D. A. Loegering* . . . . . 329
In vivo activation of the fibrinolytic enzyme system of dogs. *Taylor, F. B., Jr., J. Singleton III, and A. F. Bickford, Jr.* . . . . 334
Effect of physical exercise on blood clotting and fibrinolysis. *Iatridis, S. G., and J. H. Ferguson* . . . . . 337
Evidence that the $P_{CO_2}$ of mixed venous blood is not a regulator of ventilation during exercise. *Storey, W. F., and J. Butler* . . . . . 345
Effect of $CO_2$ on hyperventilation produced by vibration. *Young, W. A., D. B. Shaw, L. J. Buckles, J. S. Outerbridge, C. E. Reeves, and J. C. Truman* . . . . . 349
Slowing of the heart at the beginning of exercise. *Craig, F. N., and E. G. Cummings* . . . . . 353
Circulatory and ventilatory effects of exercise in smokers and nonsmokers. *Chevalier, R. B., J. A. Bowers, S. Bondurant, and J. C. Ross* . . . . . 357
Differences between ethnic groups in physical working capacity. *Wyndham, C. H., N. B. Strydom, J. F. Morrison, J. Peter, C. G. Williams, G. A. G. Bredell, and A. Joffe* . . . . . 361
Energy cost of running. *Margaria, R., P. Cerretelli, P. Aghemo, and G. Sassi* . . . . . 367
Kinetics and mechanism of oxygen debt contraction in man. *Margaria, R., P. Cerretelli, P. E. diPrampero, C. Massari, and G. Torelli* . . . . . 371
Temperature regulation of Eskimos, Indians, and Caucasians in a bath calorimeter. *Milan, F. A., J. P. Hannon, and E. Evonuk* . . . . . 378
Artificial acclimatization of women to heat. *Hertig, B. A., H. S. Belding, K. K. Kraning, D. L. Batterton, C. R. Smith, and F. Sargent II* . . . . . 383
Different effects of hypothermia on two syndromes of positive acceleration. *Stiehm, E. R.* . . . . . 387
Nature of "imperfect" elasticity of articular cartilage. *Elmore, S. M., L. Sokoloff, G. Norris, and P. Carmeci* . . . . . 393
Silver-silver chloride electrode as a nonpolarizable bioelectrode. *Feder, W.* . . . . . 397
Relationship between fractions of the Q-T interval. *Simonson, E., L. D. Cady, Jr., and M. Woodbury* . . . . . 402

SPECIAL COMMUNICATIONS

Portal vein ligation in mice; portal hypertension, collateral circulation, and blood flow. *Cheever, A. W., and K. S. Warren* . . . . . 405
Controlling and recording rates of freezing and defrosting of human semen. *Freund, M., and J. Wiederman* . . . . . 407
Absorption by an in vitro preparation of dog intestinal mucosa. *Hakim, A., R. G. Lester, and N. Lifson* . . . . . 409
Olfactory threshold technique with nitrogen dilution of *n*-butane and gas chromatography. *Schneider, R. A., J. P. Costiloe, A. Vega, and S. Wolf* . . . . . 414
Muscle-transducer method of recording respiratory movements in small animals. *Bhatia, B., and V. N. Rao* . . . . . 418
A new method for registration of oxyhemoglobin dissociation curves. *Colman, C. H., and I. S. Longmuir* . . . . . 420
A new method of measurement of compliance and resistance of lungs and thorax. *McIlroy, M. B., D. F. Tierney, and J. A. Nadel* . . . . . 424
Acoustic transmission characteristics of the thorax. *Zalter, R., H. C. Hardy, and A. A. Luisada* . . . . . 428
A new method for indirect recording of arterial pressure in unanesthetized rats. *Korol, B., and W. McShane* . . . . . 437
Chronic tracheostomy in dogs. *Thilenius, O. G., and C. B. Vial* . . . . . 439
Variance as a measure of tremor amplitude. *Randall, J. E., and J. Metzger* . . . . . 440
A low profile electrode system for recording cortical EEG of unanesthetized rats. *Gottlieb, S. F., R. V. Jagodzinski, and W. J. Semerau* . . . . . 442
A simple respirator for laboratory use. *Paleček, F.* . . . . . 443
Microscope as a stereotaxic instrument for the rat. *Barry, T. J., W. D. Hagamen, and J. E. Sherlock* . . . . . 445

## No. 3. MAY 1963

Effect of exercise on pulmonary diffusing capacity. *Turino, G. M., E. H. Bergofsky, R. M. Goldring, and A. P. Fishman* . . . . . 447
Diving pattern, lung volumes, and alveolar gas of the Korean diving woman (ama). *Hong, S. K., H. Rahn, D. H. Kang, S. H. Song, and B. S. Kang* . . . . . 457
Lung volumes and ventilatory responses to high $CO_2$ and low $O_2$ in the ama. *Song, S. H., D. H. Kang, B. S. Kang, and S. K. Hong* . . . . . 466
Alveolar gas exchange during breath-hold diving. *Lanphier, E. H., and H. Rahn* . . . . . 471
Alveolar gas exchange during breath holding with air. *Lanphier, E. H., and H. Rahn* . . . . . 478
Changes in body temperature and basal metabolic rate of the ama. *Kang, B. S., S. H. Song, C. S. Suh, and S. K. Hong* . . . 483
Bradycardia in human divers. *Irving, L.* . . . . . 489
Response to high pressure oxygen of conscious volunteers and patients. *Foster, C. A., and I. Churchill-Davidson* . . . . . 492
Relation between work output of respiratory muscles and end-tidal $CO_2$ tension. *Milic-Emili, J., and J. M. Tyler* . . . . . 497
Volume-pressure relationships during pressure breathing and voluntary relaxation. *Johnson, L. F., Jr., and J. Mead* . . 505
Alveolar gas exchange during submarine escape. *DuBois, A. B., G. F. Bond, and K. E. Schaefer* . . . . . 509
Direct measurement of respiratory pleural pressure changes in normal man. *Daly, W. J., and S. Bondurant* . . . . . 513
Relation between anatomic respiratory dead space and body size and lung volume. *Hart, M. C., M. M. Orzalesi, and C. D. Cook* . . . . . 519
Respiratory responses mediated through superficial chemosensitive areas on the medulla. *Mitchell, R. A., H. H. Loeschcke, W. H. Massion, and J. W. Severinghaus* . . . . . 523
Pulmonary function in the newborn infant: the alveolar-arterial oxygen gradient. *Nelson, N. M., L. S. Prod'hom, R. B. Cherry, P. J. Lipsitz, and C. A. Smith* . . . . . 534
Changes in compliance in rabbits subjected to acute bronchoconstriction. *Anthonisen, N. R.* . . . . . 539
Mechanism and pharmacology of endotoxin shock in sheep. *Halmagyi, D. F. J., B. Starzecki, and G. J. Horner* . . . . . 544
Effect of a systemic A-V fistula and of pulmonary embolization on diffusing capacity. *Williams, M. H., Jr., and B. J. Sobol* . . . . . 553
Relation between pressure and diameter in main pulmonary artery of man. *Greenfield, J. C., Jr., and D. M. Griggs, Jr.* . . . . . 557
Pulmonary circulation and oxygen transport in lambs at high altitude. *Reeves, J. T., E. B. Grover, and R. F. Grover* . . 560
Pulmonary vasoconstriction in steers at high altitude. *Grover, R. F., J. T. Reeves, D. H. Will, and S. G. Blount, Jr.* . . . 567
Circulatory responses to high altitude in the cat and rabbit. *Reeves, J. T., E. B. Grover, and R. F. Grover* . . . . . 575
Specificity of H ion concentration as a carotid chemoreceptor stimulus. *Hornbein, T. F., and A. Roos* . . . . . 580
Effects of continuous administration of angiotensin II on ventricular performance. *Downing, S. E., and E. H. Sonnenblick* . . . . . 585
A veni-venomotor response to local congestion. *Wallis, W., R. Brenman, and C. R. Honig* . . . . . 593
Reversible cooling of cerebellum in awake, unrestrained rats. *Manni, E., L. W. Mills, and R. S. Dow* . . . . . 597
Effect of hyperthermia on peripheral dark adaptation rates. *Kissen, A. T.* . . . . . 600
Metabolic response to cold air in men and women in relation to total body fat content. *Buskirk, E. R., R. H. Thompson, and G. D. Whedon* . . . . . 603
Metabolic and thermal response of Eskimos during muscular exertion in the cold. *Andersen, K. L., J. S. Hart, H. T. Hammel, and H. B. Sabean* . . . . . 613

Blood lactates after prolonged severe exercise. *Åstrand, P.-O., I. Hallbäck, R. Hedman, and B. Saltin* . . . . . 619
Tissue studies during recovery from immobilization atrophy. *Eichelberger, L., M. Roma, and P. V. Moulder* . . . . . 623
Partial marrow shielding and total-body irradiation. *Noyes, W. D., C. A. Finch, H. Wasserman, and K. Glickman* . . . . . 629

SPECIAL COMMUNICATIONS

A closed system for prolonged exposure of small animals to artificial atmospheres. *Dines, J. H., and F. A. Hitchcock* . . . . . 633
Electronic micrometer. *Lentini, E. A., and W. V. Guyton* . . . 636
An index of alveolar ventilation. *Lichtneckert, S. J. A., and C. E. G. Lundgren* . . . . . 639
A method for the study of peripheral vascular responses in the rat. *Brody, M. J., R. A. Shaffer, and R. L. Dixon* . . . . . 645
Hydraulic impedance of rigid cannulas. *Randall, J. E.* . . . . . 648
A technique for recording multiple avian embryonic electrocardiograms. *Burton, S. D., H. N. Uhley, and T. Ishida* . . . 650
Effects of flow profile on electromagnetic flowmeter accuracy. *Goldman, S. C., N. B. Marple, and W. L. Scolnik* . . . . . 652
In vivo extraluminal contractile force transducer for gastrointestinal muscle. *Jacoby, H. I., P. Bass, and D. R. Bennett* . . . . . 658
A numerical index of the stability of lung expansion. *Gruenwald, P.* . . . . . 665
A rebreathing method for determining mixed venous $P_{CO_2}$ during exercise. *Ashton, C. H., and G. J. R. McHardy* . . . . 668
A modified muscle ergograph. *De Jong, R. B. J., and W. Terpoorten* . . . . . 672

## No. 4. JULY 1963

Alveolar-arterial oxygen tension gradient due to diffusion. *Staub, N. C.* . . . . . 673
Reflex effects of lung inflation on tracheal volume. *Widdicombe, J. G., and J. A. Nadel* . . . . . 681
Pulmonary diffusing capacity of athletes. *Mostyn, E. M., S. Helle, J. B. L. Gee, L. G. Bentivoglio, and D. V. Bates* . . . . 687
Pulmonary mechanics and diffusing capacity following simulated space flight of 2 weeks duration. *DuBois, A. B., R. W. Hyde, and E. Hendler* . . . . . 696
Bronchial pressures and dimensions in health and obstructive airway disease. *Macklem, P. T., R. G. Fraser, and D. V. Bates* . . . . . 699
Compliance of the chest wall in chronic bronchitis and emphysema. *Cherniack, R. M., and A. Hodson* . . . . . 707
Cerebrospinal fluid acid-base balance during a changing ventilatory state in man. *Fisher, V. J., and L. C. Christianson* . . . . . 712
Respiratory control in uremic acidosis. *Pauli, H. G., and F. Reubi* . . . . . 717
Effect of vascular pressure and blood flow on CO diffusion in the perfused dog lung. *Burrows, B., and A. H. Niden* . . . . 722
Variability of magnitude of the Bohr effect in human fetal blood. *Kirschbaum, T. H.* . . . . . 729
Tissue gas tensions in experimental anemia. *Bartlett, D., Jr., and S. M. Tenney* . . . . . 734
Optical density changes in dog blood at full oxygen saturation with changes in $pCO_2$. *Salmon, P., R. Stish, and M. B. Visscher* . . . . . 739
Thermal indicator sampling and injection sites for cardiac output. *Mohammed, S., C. J. Imig, E. J. Greenfield, and J. W. Eckstein* . . . . . 742
Influence of temperature on olfactory sensitivity. *Stone, H.* . . 746
Relationship between skin temperature and performance in the Java monkey. *Bush, R. D., F. H. Rohles, Jr., H. H. Reynolds, and F. G. Koestler* . . . . . 752
Metabolic and thermal responses to muscular exertion in the cold. *Strømme, S., K. L. Andersen, and R. W. Elsner* . . . 756
Aerobic working capacity of Eskimos. *Andersen, K. L., and J. S. Hart* . . . . . 764
Contralateral effects of thermal stimuli on manual performance capability. *Clark, R. E., and C. F. Flaherty* . . . . 769
Body-temperature regulation in the normal and cold-acclimatized cat. *Adams, T.* . . . . . 772
Mechanisms of cold acclimatization in the cat. *Adams, T.* . . . . 778
Relation of local skin temperature and local sweating to cutaneous blood flow. *Senay, L. C., Jr., L. D. Prokop, L. Cronau, and A. B. Hertzman* . . . . . 781
Effect of environmental temperatures on retention of cesium 137 by mice. *Furchner, J. E., and C. R. Richmond* . . . . . 786
Exercise blood flow changes in the human forearm during physical training. *Rohter, F. D., R. H. Rochelle, and C. Hyman* . . . . . 789
Relationship of increased breath-holding diffusing capacity to ventilation in exercise. *Ross, J. C., R. W. Reinhart, J. F. Boxell, and L. H. King, Jr.* . . . . . 794
Oxygen cost of treadmill walking. *Workman, J. M., and B. W. Armstrong* . . . . . 798
Local muscle endurance with open and occluded intramuscular circulation. *Start, K. B., and R. Holmes* . . . . . 804
Effect of vapor pressure on physiologic strain and body heat storage. *Hall, J. F., Jr.* . . . . . 808
Effect of exercise on Na and K concentrations in human saliva and serum. *Salminen, S., and A. Konttinen* . . . . . 812
Respiratory quotients of human kidney in vivo. *Barker, E. S., A. P. Crosley, Jr., and J. K. Clark* . . . . . 815
Early changes in serum enzymes in the rat following burn trauma. *Spector, A. A., and W. A. Pauli* . . . . . 818
Effect of postburn serum on in vitro respiration of normal myocardium. *Spector, A. A.* . . . . . 821
Metabolism of $Sr^{85}$ and $Ca^{45}$ in man after single and multiple doses. *Samachson, J.* . . . . . 824

SPECIAL COMMUNICATIONS

Validation of insorption by blood analysis with comparisons of systemic and portal venous disappearances of $D_2O$, $Na^{24}$, and $K^{42}$. *Code, C. F., J. C. Moll, and A. L. Orvis* . . 829
Apparatus for discarding dead-space gas. *Marshall, R.* . . . . 833
An easily removable self-retaining indwelling needle and cannula. *Napke, E.* . . . . . 835
A simplified method for obtaining cerebrospinal fluid pressure measurements in the dog. *Verdura, J., R. J. White, and H. Kretchmer* . . . . . 837
A flexible plethysmograph which may be used as a pressure plethysmograph. *Kirk, R. M.* . . . . . 838
Cardiac monitoring and telemetering system. *Furman, K. I., and N. Z. Lupu* . . . . . 840
Specific heat of canine blood. *Epstein, W., M. B. Visscher, R. Stish, and H. Ballin* . . . . . 843
Use of an electromagnetic flowmeter for urine flow measurements. *Cardus, D., E. M. Quesada, and F. B. Scott* . . . . . 845

## No. 5. SEPTEMBER 1963

Cardiopulmonary manifestations with high $O_2$ tension at atmospheric pressure. *Smith, C. W., P. H. Lehan, and J. J. Monks* . . . . . 849
Heart rate responses to apneic underwater diving and to breath holding in man. *Craig, A. B., Jr.* . . . . . 854
Airway volume, airway resistance, and work and force of breathing: theory. *Widdicombe, J. G., and J. A. Nadel* . . 863
Measurement of oxygen tensions in cerebral tissues of rats exposed to high pressures of oxygen. *Jamieson, D., and H. A. S. van den Brenk* . . . . . 869
Acid-base changes in the fetal lamb before and after lung expansion. *Assali, N. S., W. A. Manson, L. W. Holm, and M. Ross* . . . . . 877
Effect of vagotomy and vagal stimulation on lung mechanics and circulation. *Colebatch, H. J. H., and D. F. J. Halmagyi* . . . . . 881
Oxygen washout studies in the anesthetized dog. *Cater, D. B., D. W. Hill, P. J. Lindop, J. F. Nunn, and I. A. Silver* . . . . . 888
Ventilatory response to inspired carbon dioxide in infants and adults. *Avery, M. E., V. Chernick, R. E. Dutton, and S. Permutt* . . . . . 895
Ventilatory capacity during prolonged exposure to simulated altitude without hypoxia. *Ulvedal, F., T. E. Morgan, Jr., R. G. Cutler, and B. E. Welch* . . . . . 904
Basal oxygen uptake of man at high altitude. *Grover, R. F.* . . 909
Right ventricular hypertrophy in animals at high altitude. *Hultgren, H. N., E. Particorena, and H. Miller* . . . . . 913
Left ventricular ejection time index in man. *Weissler, A. M., L. C. Harris, and G. D. White* . . . . . 919

Hemodynamics of collapsible vessels with tone: the vascular waterfall. *Permutt, S., and R. L. Riley* ... 924
Lactate, pyruvate, glucose, and free fatty acid in mixed venous and arterial blood. *Harris, P., T. Bailey, M. Bateman, M. G. Fitzgerald, J. Gloster, E. A. Harris, and K. W. Donald* ... 933
Effects of differential housing and stress on diet selection, water intake, and body weight in the rat. *McDonald, D. G., J. A. Stern, and W. W. Hahn* ... 937
Body composition and serum electrolyte concentrations. *Boling, E. A., and J. B. Lipkind* ... 943
Glass electrode measurements of blood sodium and potassium in man. *Friedman, S. M., S.-L. Wong, and J. H. Walton* ... 950
Relationship between ambient temperature and acetylating capacity of human blood. *Blondheim, S. H., G. Neumann, E. Kott, and Z. Ben-Ishai* ... 955
Body temperature regulation in mice resuscitated from deep hypothermia. *Sudak, F. N., W. B. Essman, and E. M. Shen* ... 959
Body temperature as a determinant in maze acquisition by mice. *Sudak, F. N., and W. B. Essman* ... 964
Seasonal variation of magnesium and calcium in serum of the hypothermic rat. *Nowell, N. W., and D. C. White* ... 967
Response to cold of Eskimos of the eastern Canadian Arctic. *Brown, G. M., R. E. Semple, C. S. Lennox, G. S. Bird, and C. W. Baugh* ... 970
Combined effect of cold and alcohol on heat balance in man. *Andersen, K. L., B. Hellström, and F. V. Lorentzen* ... 975
Effect of repeated exercise on the lesser circulation. *Widimsky, J., E. Berglund, and R. Malmberg* ... 983
Cardiovascular responses to head-stand posture. *Rao, S.* ... 987
Effect of muscular exercise on plasma viscosity in correlation with postprandial triglyceridemia. *Konttinen, A., and T. Somer* ... 991
Pulse count as a measure of energy expenditure. *Malhotra, M. S., J. Sen Gupta, and R. M. Rai* ... 994
Bilateral differences in forearm blood flow as measured with capacitance plethysmograph. *Hyman, C., D. Burnap, and S. Figar* ... 997
Calf blood flow and oxygen usage during bradykinin infusions. *Coffman, J. D., and S. L. Javett* ... 1003
